Notes for the reviewer

This section gives the reviewer a longer paragraph to inspect in the document preview. LocalLens is a prototype: extracted information should always be checked against the source before it is copied or exported.

Review checklist

A final page for checking multi-page PDF preview and navigation.

Before using extracted details

- ☐ Compare each suggested value with the original document.
- ☐ Correct spelling, punctuation, or digits that were read incorrectly.
- ☐ Treat a missing field as unknown; do not guess a value.
- ☐ Use only synthetic or consented documents during a demo.
